

T-Shirt Bag

Recycle an old T-shirt into a re-usable bag.

Step 1

Lay the t-shirt out on a flat work surface and try to flatten as many wrinkles as possible before you start to cut.

Step 2

Cut the arms and neck off the t-shirt by cutting through both the front and back sides. Trim the hem of the shirt if it is scalloped so that it is a straight, even line.

Step 3

Cut strips into the bottom of the t-shirt. Cut them so they are approximately 1" wide and 3" to 4" long.

Step 4

Turn the t-shirt inside out and tie the strips together. Tie one strip from the front of the t-shirt to the corresponding strip directly on the back of the t-shirt. Continue until each strip has been knotted.

Step 5

Turn the bag right side out so the fringed pieces are hidden away inside the bottom of the bag. There you have it, your very own recycled t-shirt tote!
